Provided that the Inspector shall not accept any plant or machinery mentioned which is constructed, attended to or operated, so as to contravene the provisions of any other Act.

**10. Railways and Transport.**—In every factory, where, within the precincts, there are railways, or other electrical or mechanical means of

transport, such railways or means of transport shall be designed, maintained and operated in such a manner as to satisfy the Inspector that there is no danger to human life and safety from them :

13. **Lighting.**—Efficient measures to the satisfaction of the Inspector shall be taken for securing and maintaining sufficient and suitable lighting in every part of a factory in which persons are working or passing.

14. **Fencing (General).**—In every factory, all moving parts of machinery shall be securely fenced, unless they are so situated that they are in the opinion of the Inspector incapable of causing injury to workers. Fencing shall be so designed that it is impossible for any person to pass between the fencing and a moving part, and also to give protection to a person oiling, cleaning, or otherwise attending to the machinery, and to all persons who may be in the neighbourhood of a moving part while it is in motion.

15. Suitable striking gear or other efficient mechanical appliances shall be provided and used to move driving straps on fast and loose pulleys which form part of the transmission machinery, and any such gear or appliances shall be so constructed as to prevent accidental restarting of the machinery :

Provided that where the Chief Inspector of Factories is satisfied that such striking gear or appliances are not necessary or are impracticable for any class of machines, he may by order in writing exempt such class of machines from this requirement.

16. **Fencing (Electrical).**—In every factory, all electrical circuits or parts of such, or any objects electrically connected with them, whether commonly or occasionally in an electrified condition, which by reason of their position could cause injury to the person, shall be protected adequately to the satisfaction of the Inspector either by fencing or insulation, or by both, in such a manner as to remove danger of injury :

Provided that where automatic mechanism is installed for the purpose of immediately removing the electrification on the occurrence of a fault, such mechanism shall be taken into account by the Inspector when considering the adequacy or otherwise of the protection furnished :

19. **Unsuitable Fencing.**—When any plant, machinery, apparatus, or fittings in a factory are not safeguarded from danger to human life, as prescribed in rules 14, 15, 16, 17 and 18, such plant, machinery, apparatus or fittings shall be deemed not to be securely fenced within the meaning of section 18(1).

20. (1) **Alternatives to Fencing.**—If in any case it is represented to the Inspector and agreed to by him in writing that fencing would unduly obstruct a manufacturing process being carried on in the factory or would be otherwise impracticable, such other protection shall be provided as the Inspector may direct instead of fencing.

(2) Devices which automatically remove the hand of the operator from or prevent its approaching a dangerous part shall be deemed equivalent to secure fencing for that part.

(3) Where there are available safety devices which (a) make it impossible to expose a dangerous part of machinery whilst in motion or (b) stop a machine forthwith in case of danger, such part of machine shall be deemed to be securely fenced, provided that such devices are fitted and maintained in efficient working order.

21. The following rules for the protection from danger of persons employed in attending to machinery in motion shall be observed in every factory :—

(i) **Replacing of Belts.**—Every person who goes up to replace a belt or to oil bearings or shafts shall wear a loin cloth or tight trousers, and shall not wear any loose clothing which is liable to be caught in the machinery.

(iii) All ladders used in replacing belts shall be specially made and reserved for that work, and shall be provided with hooks and spurs.

(iv) As far as possible all important pulleys shall be provided with belt-hangers :

Provided that, when the main belts of any machinery have to be adjusted, the machinery shall be stopped and shall not be set in motion again until such belts have been completely adjusted.

22. **Failure to comply with Fencing Orders.**—If the manager of a factory has not complied with an order to fence or otherwise protect any machinery after having been requested to do so in writing by an Inspector, the latter may, on a subsequent visit, serve on the manager an order in writing prohibiting the use of the machinery in question, until the orders have been carried out and passed by the Inspector as satisfactory.

23. If the Chief Inspector of Factories has reason to believe that there is a defect or deficiency in the machinery, plant or structure of a factory which in his opinion may endanger human life or safety, the occupier or manager of such factory shall, if called upon to do so by the Chief Inspector of Factories, supply such drawings, specifications or particulars, and carry out such examination or tests as may, in the opinion of the Chief Inspector of Factories, be necessary to determine whether such machinery, plant or structure may be used with safety.

## PART V.

28. (1) **Humidification.**—In every factory or part of a factory wherein the atmosphere is artificially humidified, whether intentionally or unintentionally, the humidification shall not be allowed to reach such a degree that it is injurious to the health of the persons employed.

(2) No steam shall be used for the purpose of producing artificial humidification in any department of a cotton mill the dry bulb temperature of which exceeds 85 degrees Fahrenheit.

(3) The pipes used for the introduction of steam into the atmosphere in any department of a cotton mill shall, so far as they are within the department, be as small, both in diameter and length, as is reasonably practicable and shall be effectively covered with non-conducting material to the satisfaction of the Inspector, so as to minimise the amount of heat thrown off by them into the department.

(4) In all departments of cotton mills where artificial humidification is used and in other departments where the Inspector so requires, hygrometers shall be provided in positions approved by the Inspector. Such hygrometers shall be of a pattern approved by the Inspector and shall be maintained in such manner as he shall direct.

29. (1) **Drinking Water.**—In every factory a supply of water fit for drinking, and consisting of at least as many gallons as there are persons employed in the factory, shall be provided daily free of cost.

(3) Proper arrangements approved by the Inspector shall be made for maintaining in a drained and cleanly condition the area round the place where the drinking water is distributed.

(4) When the drinking water is obtained from an intermittent public water-supply, each factory shall be provided with a storage of water of not less than one gallon per head of persons employed.

(5) The Inspector may, at any time, in order to satisfy himself that the water supplied is fit for drinking, take samples for analysis, and the cost of analysis shall be borne by the occupier of the factory.

3 (1) **Limewashing.**—In every factory the inside surface of all walls of the rooms in which persons are employed, and all the ceilings or tops of such rooms (whether such walls, ceilings or tops be plastered or not), and all passages and staircases, shall be limewashed completely every 14 months to date from the time of last limewashing :

Provided that the local Government may, by special order, exempt any class of factories or parts thereof from the provisions of this rule, when they are of opinion that the said provisions are not necessary under clause (a) of section 9, or are, by reason of the special circumstances, inapplicable.
